UDHOME2

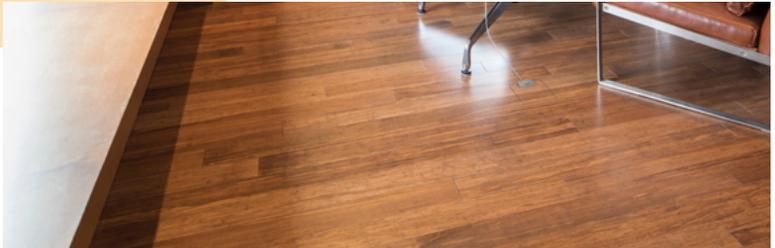

Floor socket

ELEGANT

The UDHOME2 floor socket is stylish and inconspicuous, and with its slim cover edges it can be installed elegantly into different floor types.

Floor coverings made of stone, tiles, synthetic materials or wood can easily be integrated into the cover.

54°

The support inside the UDHOME2 socket is slanted at an angle of 54° so that also larger plugs can disappear under the cover without bending the cable.

Selected materials for high-quality floor coverings: stainless steel and brass are not only visually appealing – but also extremely robust.

PERFECT FIT

The very slim frame fits perfectly and seamlessly into any floor.

COMPACT

The square and compact design of the UDHOME2 socket offers room for two Modul45® and up to two data technology connectors.

With a size of 140 x 140 mm and a height from 100 mm, the UDHOME2 socket is extremely compact. Through height adjustment supports, it can be adjusted to floor coverings of up to 135 mm – and with accessories, even to more than 190 mm.

Even larger plugs disappear under the cover. The cables are routed safely through the cord outlet.

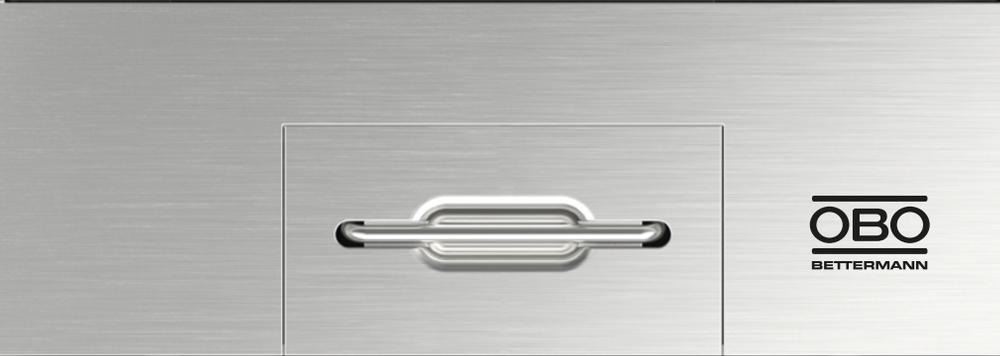

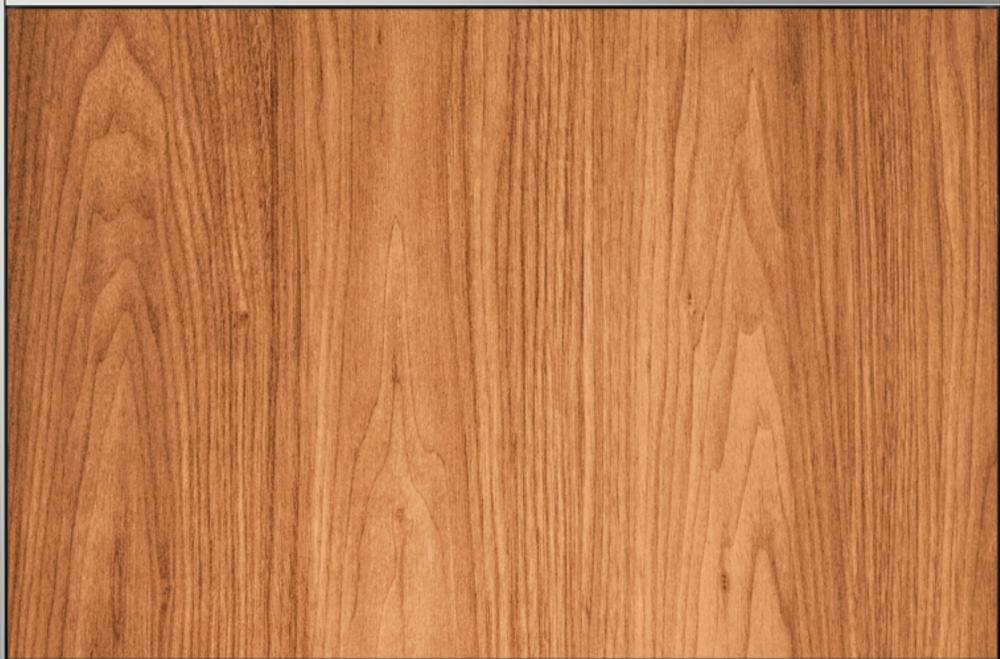

The UDHOME2 supplies power and data via the floor, be it at home or in the office.
